## My top skills

### Backend

PHP, Laravel, GIT, Deployment, SQL, MySQL, OOP, JSON, Rest API, MVC, Data Structures

### Frontend

Javascript, jQuery, HTML, CSS, SCCS, Figma to HTML, Responsive, Bootstrap, AJAX

## Language

English - B1, B2

Azerbaijani - Native

## Certifications

**Hackerrank - SQL (Advanced) Certificate**

## Education

2024 - 2026 (Master)  
Azerbaijan University of Architecture and Construction - Process Automation Engineering  
2020 - 2024 (Bachelor - Grade: **84.5**)  
National Aviation Academy - Process Automation Engineering

## About

I have more than 1 year experience in web development.

As a backend developer, I have worked on big projects. I have worked extensively with large databases and optimized codes for efficiency. I have consistently maintained motivation to learn and to be updated on the latest innovations in the field.

## Work experience

Apr 2024 - now

SamiGlobe Solutions - Backend developer/ PHP

During my time at SamiGlobe Solutions, I have been an integral part of a large-scale project involving extensive backend development and API integrations. My responsibilities included:

- **Api integration:** Developed and tested multiple API integrations, including Zamex.az, ensuring seamless communication between different systems.
- **Control panel** Designed and implemented a comprehensive control panel for managing system settings and data.
- **REST API Development:** Built RESTful APIs to support front-end functionality and third-party integrations, focusing on scalability and performance.
- **Database optimization:** Conducted extensive database optimization for a project handling millions of records, ensuring efficient data retrieval and storage. Utilized indexing and query optimization techniques to enhance database performance.
- **Statistics and Reporting:** Developed a statistics panel for real-time monitoring and reporting of data across multiple tables, providing actionable insights to the business.
- **Laravel Framework:** Leveraged the Laravel framework to build robust and maintainable backend systems, utilizing Eloquent ORM for database interactions.

Bronet Group MMC - Full-stack Web developer

At Bronet Group MMC, I was responsible for full-stack development of websites, where I utilized my skills to build robust and user-friendly web applications from scratch. My key contributions included:

- **Website Development from Scratch:** Led the development of multiple websites from the ground up, ensuring a strong foundation with clean, modular code and responsive design.
- **Front-end and Back-end Integration:** Built both front-end and back-end components using technologies such as HTML, CSS, JavaScript, PHP, and Laravel, ensuring seamless integration and functionality.
- **SEO Optimization:** Implemented effective SEO strategies to enhance website visibility and ranking on search engines. This included optimizing meta tags, improving site load speed, and utilizing best practices for content structuring.
- **New Feature Development:** Continuously added new functionalities to the websites, enhancing user experience and engagement. This involved developing custom plugins, integrating third-party APIs, and enhancing site navigation.

Apr 2023 - Jul 2023

Professional IT · Internship

During my 4-month internship at Professional IT, I was actively involved in backend development for the Alimok.com startup. My role focused on enhancing the startup's platform by developing new functionalities and optimizing existing processes. Key achievements and responsibilities included:

- **Backend Development with PHP Yii Framework:** Utilized the PHP Yii framework to develop robust backend functionalities, ensuring the application was scalable, secure, and efficient. This included writing clean, maintainable code and adhering to best practices in web development.
- **Development of Referral System:** Designed and implemented a referral link system that successfully increased user engagement and expanded the startup's user base. This feature allowed users to generate and share referral links, tracking referrals and rewards accurately.
- **Query Optimization for Large Data Sets:** Optimized SQL queries to handle over 100,000 records efficiently, reducing query execution time and enhancing the overall performance of the startup's platform. This involved indexing, query restructuring, and utilizing Yii's ActiveRecord features for optimal performance.
- **Functionality Testing and Debugging:** Conducted thorough testing and debugging of new features to ensure they were bug-free and met the startup's requirements. This included unit testing and integration testing, as well as debugging complex issues.
